02 | YOUR PROJECT

Proposed configuration

Information supplied for this commercial reference. The exact version and functions remain subject to confirmation in the quotation.

Protocol	S504.
Credentials	Up to 5,000 credentials: remote controls, badges, codes and mobile application.
Peripherals	Up to 2 badge readers / coded keypads.
Management	Remote management via MyCardin.
Outputs	1 physical relay and 1 transistor output.
Power supply	12 V supply to be provided.
Connectivity	Multi-operator DATA SIM stated to cover the product's lifetime. Service and connectivity terms to be confirmed.

To prepare your project

Specify the access points to control, users and permissions, and existing equipment and power supplies. Have 4G coverage checked at the installation site.

Understand the family documentation

The official Cardin catalogue presents CARHF4G and CARHF4G-10, which are different versions. It provides family context; it does not validate the commercial configuration above and is not an exact CARHF4G1V manual.

Official Cardin 2026 catalogue | CARHF4G family, pp. 182-183
